**Bauma China 2008**

The Bauma China 2008, that took place in November 2008 at the international fair ground of the Chinese port city of Shanghai, busted all the records of the last years. Over 1600 exhibitors from 30 countries elated 113000 visitors on 210000 m² exhibition space. Compared to the last Bauma China in 2006 the fair has hence grown by over 40%! Needless to say that the company KINSHOFER had also been part of this in China and Asia biggest platform for the construction industry.

In collaboration with the companies Darda and Brokk, that like the company KINSHOFER belong to the swedish Lifco AB-group, the manufacturer from Waakirchen (Germany) took part in the fair Bauma China 2008 in Shanghai. KINSHOFER was represented by the newly formed Darda KINSHOFER Construction Machinery Co.Ltd. located in Beijing, whereas there had also been representatives from the headquarters in Germany, that had travelled all the way to Shanghai to take part in this event. Thus an international team was formed up, composed of employees of the respective countries that answered the questions of the likewise international audience.

Among the exhibited attachments of the company KINSHOFER there was also an orange peel grab of the P-series for excavators that attracted the utmost interest, as well as the rotators, that could convince due to their wide range, their robustness and their efficiency.

The exhibition takes place every two years in the Shanghai New International Expo Centre (SNIEC). The next Bauma China is scheduled for autumn 2010.
